

Grades 6-12 Virtual School Info:

Families will be notified by the Taylor County Technology Department through School Messenger regarding the distribution of iPads. We anticipate deployment taking place within the next two weeks. However, if a device (laptop or tablet) is available in the home, students can begin on Monday, September 8th. WV Virtual School is a self-paced program so students will not lose instruction if there is not a device in the home to use until the Taylor County-provided device is available.

Software training videos for devices and software will be posted on county and school websites as available. These videos will be for students and families.

The WV Virtual School staff will be hosting student orientations the week of September 1st to help students transition to online learning. Students will receive a few helpful hints and will also be shown how to login to their classes. Links to the sessions can be found below. Attendance is not mandatory but these opportunities are being provided as a support for students.
